Resources

At Kid Sense we try to be as helpful as we can in giving families and professionals valuable resources to assist in the care of a child with developmental challenges.

Our therapists are experts in their field and regularly write blogs and social media posts. We encourage you to like and follow our social networks, and subscribe to receive our [blogs](#). They are normally packed full of tips and practical exercises you can enjoy with your child.

Through our many years working in clinical practice, as well as therapeutic consultation with child care, kindergarten and school teachers in South Australia we have developed many [checklists and charts](#). They list the 'typical' child development by age and the possible implications if a child has not reached typical developmental milestones, and can be an incredibly useful guide if you think something is not quite right with your child.

Our unique [Development Detector](#) is a screening tool to help you work out issues of concern and what you can do about them.

If you'd like to discuss your concerns with Kid Sense please call us on 1800 543 736.

Contact us today to make an initial enquiry or book an assessment for your child on 1800 KID SENSE (1800 543 736)
